How To Create SCOPUS API
step-by-step procedure

https://dev.elsevier.com/sc_apis.html

1.   After you click on the above link you will see the details about Elsevier Scopus APIs.

2.   Just scroll down to see the heading 'Where do I get an API ?'

3.   Now you click on **Elsevier Developer Portal**, then a new page will open in a new tab.

4.   Here it will prompt you to enter a valid email ID, here we suggest you enter the organizational email ID only and click on continue to proceed with Register page.

5.   Here, you add all the required fields and a password to complete the Register process.

6.   A verification mail will be sent to the registered email id (which you have provided in the 4th step)

7.   Then you validate by click on the link sent to your email ID.

8.   Then it asks you to enter details in the LABEL field, just you enter your institute acronym.

9.   Then it prompts you to enter institute website address OR URL of the institute enter the same.

10. You will then be asked to accept the terms and conditions, click and accept further to get your SCOPUS API key.

11. Once you receive the SCOPUS API key, you are requested to provide the same details at –'Instance Prerequisite information' in the google form link which you have received from irins@inflibnet.ac.in email ID.
